

Timothy A. Myers

Associate Research Scientist | University of Wyoming
Department of Atmospheric Science · Laramie, Wyoming
tmyers12@uwyo.edu · University profile · Google Scholar
ORCID: 0000-0003-0582-4554

Updated September 12, 2026

Research interests

Cloud feedbacks and climate sensitivity; marine low clouds; atmospheric boundary-layer processes; climate variability and air–sea interactions; observational constraints on climate models; boundary-layer observations and numerical weather prediction.

Academic and research appointments

Associate Research Scientist

Feb. 2026–present

Department of Atmospheric Science, University of Wyoming

Investigates the processes controlling low-cloud uncertainty in Earth system models using perturbed-parameter ensembles, observations, and process-based diagnostics.

Research Scientist

Oct. 2021–Feb. 2026

Cooperative Institute for Research in Environmental Sciences (CIRES),
University of Colorado Boulder; NOAA Physical Sciences Laboratory

Supported field operations and instrument maintenance for WFIP3 and PERiLS/VORTEX-USA; analyzed ground-based boundary-layer observations from these campaigns and CHEESEHEAD19; and co-developed WFIP3's 19-month event log documenting East Coast weather regimes and the occurrence of marine fog.

Postdoctoral Staff Scientist

Aug. 2018–Aug. 2021

Lawrence Livermore National Laboratory

Investigated cloud-feedback mechanisms, developed observational constraints, and evaluated global climate model simulations of cloud feedbacks. Research advisor: Mark Zelinka.

Postdoctoral Scholar

Sept. 2015–July 2018

University of California, Los Angeles

Investigated clouds and climate variability, climate model biases, and observed upper-ocean warming events. Research advisor: Carlos Mechoso.

Education

Ph.D., Earth Sciences (Climate Science)

2015

Scripps Institution of Oceanography, University of California, San Diego

Advisor: Joel Norris. Dissertation: *Investigating the variability of subtropical marine boundary layer clouds in observations and climate models.*

M.S., Oceanography (Climate Science)

2011

Scripps Institution of Oceanography, University of California, San Diego

B.S., Atmospheric Science, magna cum laude

2009

Cornell University

Honors and awards

2022	Outstanding Reviewer, <i>Geophysical Research Letters</i>
2021	Outstanding Post-Doc Award, Lawrence Livermore National Laboratory
2011–2014	NASA Earth and Space Science Fellowship

Research recognition

2026	Myers et al. (2021), featured in <i>Nature Climate Change</i> ’s 15th-anniversary retrospective on influential papers and previously featured on the journal’s cover
2024	Second author of Zelinka et al. (2020), selected by <i>Geophysical Research Letters</i> editors as an exceptional 50th-anniversary paper; the paper was previously named an Editor’s Choice and US CLIVAR Research Highlight

Teaching and mentoring

Ph.D. committee member	Current
Akarshna Ayer, Hampton University	
Summer research intern co-mentor	Summer 2022
CIRES/NOAA Allison Van Ormer	
Graduate Teaching Assistant	Winter 2015
Scripps Institution of Oceanography, University of California, San Diego <i>The Atmosphere</i> , undergraduate course. Led exam review sessions and held weekly office hours.	

Professional service

Proposal review

2023, 2018	Panel reviewer, NASA Research Opportunities in Space and Earth Science (ROSES)

Invited presentations

Dec. 2022	GFDL Climate Sensitivity Journal Club	Virtual
	<i>Observational Constraints on Low Cloud Feedback Reduce Uncertainty of Climate Sensitivity</i>	
Oct. 2022	Colorado State University	Fort Collins, CO
	<i>Observational Constraints on the Cloud Feedback Pattern Effect</i>	
Sept. 2022	University of Wyoming	Laramie, WY
	<i>Observational Evidence for a Cloud Feedback Pattern Effect</i>	
July 2022	NOAA Chemical Sciences Laboratory	Boulder, CO
	<i>Observational Constraints on the Cloud Feedback Pattern Effect</i>	
Apr. 2022	University of Michigan	Ann Arbor, MI
	<i>Constraints on Marine Cloud Feedback from Satellite Observations</i>	
Dec. 2021	American Geophysical Union Fall Meeting	New Orleans, LA
	<i>The Differing Responses of Marine Boundary Layer Clouds to Climate Warming</i>	
May 2021	CERES Science Team Meeting	Virtual
	<i>Constraints on Low Cloud Feedbacks from Observed Climate Variability</i>	
Nov. 2020	ECS & Cloud Feedback Virtual Symposia	Virtual
	<i>Observational Constraints on Low Cloud Feedback Reduce Uncertainty of Climate Sensitivity</i>	
Jan. 2020	Lawrence Livermore National Laboratory	Livermore, CA
	<i>Constraints on Low Cloud Feedbacks from Observed Climate Variability</i>	
May 2018	University of California, Irvine	Irvine, CA
	<i>Amplification of Marine Heatwave off Baja California and Regional Climate Fluctuations via Local Cloud Feedback</i>	

Feb. 2018	Lawrence Livermore National Laboratory	Livermore, CA
	<i>Observational Evidence that Low Clouds Strongly Amplified Marine Heatwave off Baja California</i>	
Oct. 2017	Dalhousie University	Halifax, Nova Scotia
	<i>Importance of Positive Low Cloud Feedback for Variations in Climate</i>	
July 2017	Gordon Research Conference on Radiation and Climate	Lewiston, ME
	<i>Importance of Positive Low Cloud Feedback in Coupled Atmosphere–Ocean Variability</i>	
Oct. 2016	NASA Jet Propulsion Laboratory	Pasadena, CA
	<i>Amplification of Summer-to-Summer Sea Surface Temperature Variability over Northern Oceans by Positive Cloud Feedback</i>	
Jan. 2016	University of California, Los Angeles	Los Angeles, CA
	<i>Investigating the Variability of Subtropical Marine Boundary Layer Clouds in Observations and Climate Models</i>	
Aug. 2015	NASA Jet Propulsion Laboratory	Pasadena, CA
	<i>Investigating the Variability of Subtropical Marine Boundary Layer Clouds in Observations and Climate Models</i>	

Contributed conference and workshop presentations

Oral presentations

Jan. 2025	American Meteorological Society Annual Meeting	New Orleans, LA
	<i>Marine Fog and Its Role in the Atmospheric Boundary Layer over Southern New England during WFIP3: Observations and Model Simulations</i>	
Feb. 2024	American Meteorological Society Annual Meeting	Baltimore, MD
	<i>Evaluation of Hub-Height Wind Forecasts over the New York Bight</i>	
Jan. 2023	American Meteorological Society Annual Meeting	Denver, CO
	<i>Cloud Radiative Effects over Northern Wisconsin during CHEESEHEAD19</i>	
Mar. 2022	NOAA Physical Sciences Laboratory	Boulder, CO
	<i>Constraints on Marine Cloud Feedback from Satellite Observations</i>	
May 2021	PCMDI Project-Wide Meeting	Virtual
	<i>Constraints on Past and Future Low Cloud Feedbacks from Observed Climate Variability</i>	
Oct. 2020	DOE RGMA Principal Investigator Meeting	Virtual
	<i>Observational Constraints on Decadal Low Cloud Feedbacks Associated with Varying Sea Surface Temperature Patterns</i>	
Oct. 2019	CFMIP Meeting on Clouds, Precipitation, Circulation, and Climate Sensitivity	Mykonos, Greece
	<i>Regionally Resolved, Observationally Constrained Marine Low Cloud Feedbacks</i>	
May 2017	Japan Geoscience Union–AGU Joint Meeting	Chiba, Japan
	<i>The Importance of Cloud Feedback for Interhemispheric Tropical Atlantic Climate Variability</i>	

Dec. 2015	American Geophysical Union Fall Meeting <i>Reducing the Uncertainty in Subtropical Cloud Feedback</i>	San Francisco, CA
Dec. 2013	American Geophysical Union Fall Meeting <i>Large-Scale Thermodynamical and Dynamical Controls on Subtropical Cloud Variability in Observations and CMIP3 and CMIP5 Models</i>	San Francisco, CA
Oct. 2013	CERES Science Team Meeting <i>The Simulation of Interannual Variability of Subtropical Clouds in CMIP3 and CMIP5 Models Compared to Retrievals from CERES, ISCCP, and CALIPSO</i>	La Jolla, CA
Mar. 2012	WCRP Workshop on CMIP5 Climate Model Analysis <i>Evaluation of Marine Stratiform Cloud Simulation in CMIP5 Models: Feedbacks, Trends, and Model Fidelity</i>	Honolulu, HI
Aug. 2008	Ohio Student Research Forum <i>The Effects of the El Niño–Southern Oscillation on the Winter Climate of the Great Basin</i>	Columbus, OH
Posters		
May 2024	CIRES Rendezvous <i>Evaluation of Hub-Height Wind Forecasts over the New York Bight</i>	Boulder, CO
Apr. 2024	European Geosciences Union General Assembly <i>Evaluation of Hub-Height Wind Forecasts over the New York Bight</i>	Vienna, Austria
May 2022	U.S. CLIVAR Workshop on the Pattern Effect <i>Constraints on the Pattern Effect Using Observations: A Low Cloud Feedback Perspective</i>	Boulder, CO
Dec. 2020	American Geophysical Union Fall Meeting <i>Observational Constraints on the Pattern Effect: A Low Cloud Feedback Perspective</i>	Virtual
Dec. 2019	American Geophysical Union Fall Meeting <i>Positive Marine Low Cloud Feedback Inferred from Satellite Cloud Observations</i>	San Francisco, CA
July 2019	Gordon Research Conference on Radiation and Climate <i>Regionally Resolved, Observationally Constrained Marine Low Cloud Feedbacks</i>	Lewiston, ME
Nov. 2018	DOE Joint Modeling Principal Investigator Meeting <i>Mechanisms for Low Cloud Feedback over the Equatorial Cold Tongues</i>	Bethesda, MD
Oct. 2018	CFMIP Meeting on Clouds, Precipitation, Circulation, and Climate Sensitivity <i>Impact of Local Cloud Feedback on Northeast Pacific Marine Heatwave and Dominant Patterns of Climate Variability</i>	Boulder, CO
Dec. 2017	American Geophysical Union Fall Meeting <i>Importance of Positive Cloud Feedback for Tropical Atlantic Variability</i>	New Orleans, LA
Jan. 2017	American Meteorological Society Annual Meeting <i>The Link Between Marine Boundary Layer Clouds and Interannual to Interdecadal Sea Surface Temperature Variability over the Atlantic and Pacific</i>	Seattle, WA

Dec. 2016	American Geophysical Union Fall Meeting <i>Coupling Between Marine Boundary Layer Clouds and Summer-to-Summer Sea Surface Temperature Variability over the North Atlantic and Pacific</i>	San Francisco, CA
Dec. 2014	American Geophysical Union Fall Meeting <i>Understanding Subtropical Cloud Feedbacks in Anthropogenic Climate Change Simulations of CMIP5 Models</i>	San Francisco, CA
Oct. 2014	Graduate Climate Conference <i>Observational and Model Estimates of Subtropical Marine Boundary Layer Cloud Trends due to Anthropogenic Climate Change</i>	Eatonville, WA
Dec. 2012	American Geophysical Union Fall Meeting <i>Observational Evidence that Enhanced Subsidence Reduces Marine Boundary Layer Cloudiness</i>	San Francisco, CA
Dec. 2011	American Geophysical Union Fall Meeting <i>Increased Marine Stratocumulus Cloudiness due to Weakened Subsidence in the Subtropics: Possible Negative Feedback to Anthropogenic Warming</i>	San Francisco, CA
Oct. 2011	World Climate Research Programme Open Science Conference <i>How Does Vertical Velocity Affect Marine Stratiform Cloud Cover?</i>	Denver, CO
Oct. 2011	World Climate Research Programme Open Science Conference <i>Evaluation of Subtropical Stratocumulus Simulation in CMIP5 Models</i>	Denver, CO
July 2008	Committee on Institutional Cooperation Summer Research Opportunities Program Conference <i>The Effects of the El Niño–Southern Oscillation on the Winter Climate of Northeastern Nevada</i>	Michigan State University

Workshops and advanced training

June–July 2013	EUCLIPSE Clouds and Climate Summer School	Les Houches, France
----------------	---	---------------------

Early research training

Summer Research Opportunities Program	Summer 2008
The Ohio State University	
Investigated El Niño–Southern Oscillation effects on winter climate in the Great Basin. Research advisors: David Porinchu and Bryan Mark.
